Letter of Appreciation acknowledging an undergraduate research experience

To Whom It May Concern

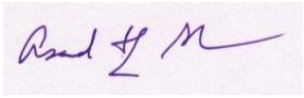

It is my utmost pleasure to appreciate and acknowledge the effort made by Ms. Sadaf Jan, a B.Tech. (Agriculture) student from Sher-e-Kashmir University of Agricultural Sciences and Technology (SKAUST) of Kashmir . The undergraduate research experience involved learning fundamentals of SIMULINK, process control and its application in the cyber-physical system arena to support a futuristic agricultural economy based on hydrogen.

Ms. Sadaf Jan pursued her undergraduate research experience between December 6, 2023 and January 31, 2024. She also participated in this research experience as an undergraduate research visitor at the Agriculture and Water Technology Development Hub at Indian Institute of Technology Ropar in December 2023, and was supported by an internship support grant for the period.

Kindly consider contacting me by email or phone if I may provide information on Ms. Sadaf Jan's potential to achieve in a research task. Her sincerity, professionalism and hard work was greatly appreciated.

I wish Ms. Sadaf Jan the very best for their future endeavors.

Thanking you sincerely,

Asad Hasan Sahir
